

UNIVERSAL PRECAUTIONS

Blood Spill Procedure

1. If a cut occurs during a service, stop the service.
2. Clean the injured area with an antiseptic.
3. Bandage the cut with an adhesive bandage.
4. Cover the injury with a glove or finger cot.
5. Clean and disinfect implements and workstation with a hospital grade disinfectant labeled as effective against HIV/ HBV or Tuberculocidal
6. Double bag all blood soiled materials and place in **RED Biohazard Container** located in the exam room.
7. Return to service.
